

Environment Policy Statement

E.A. Systems Pty Limited is a provider of quality environmental and agricultural, science and engineering services throughout rural and regional New South Wales, Queensland and Victoria.

E.A. Systems is committed to sound management principles that develop and strengthen its position in the market place and inspire stakeholders' confidence in all aspects of the enterprise.

E.A. Systems Quality Management Systems aims to integrate quality management with management of the environment and occupational health and safety systems. The QMS aims to deliver an environmental management system derived from the Australian Standard ISO14001 from within the overall quality system. In implementing this system, Rockdale is indicating its intention to comply with this standard in all aspects relating to the environment.

To reinforce this, E.A. Systems makes the following undertaking:

- To acknowledge that compliance with all legislation, appropriate standards, codes of practice and legal obligations relevant to both our business and our environmental certification program will take precedence over any other commercial considerations.
- To enforce environmental management systems to ensure that during the course of E.A. Systems' daily operations we will control the impact of all our activities on the environment by following established documented procedures.
- To understand the effects daily activities have on the environment and identify, evaluate and prioritise on a continual basis all environmental impacts, identified as being applicable to the prevention of pollution and assisting in the continual improvement of the environment and to protect the health and quality of life of all stakeholders involved with E.A. Systems.
- To utilise nutrient enriched wastewaters through the sustainable irrigation and cropping of E.A. Systems property soils. This will be undertaken in a way that will ensure minimisation of land degradation or impact on surface and ground water resources.
- To minimise the reliance on waste to landfill and continue to develop the landscape environment through the ongoing planting of trees and shrubs.

E.A. Systems' Quality Procedures Manual is a working document to be used by personnel at all levels within the company and is designed to ensure that all appropriate environmental and regulatory requirements are recognised and a consistent approach is employed throughout the company in maintaining these standards.
